## CELESTIAL HOSTS RESIDING ON OUR PLANET, according to THE URANTIA BOOK

Although Urantia, our planet, is in quarantine, isolated from the circuits of the Constellation it belongs to, it is secured by the presence of vast celestial hosts, which are organized and commanded under rigorous and powerful order, thus preserving our planet for the due evolution of humankind.

Every day our planet welcomes cosmic visitors and students, however here resides a permanent population of spiritual and semi-spiritual beings.

Notwithstanding it doesn't reveal us the totality of numbers and types of those celestial residents, The Urantia Book does present us a general view where we can perceive that, in the least, the amount of those celestial residents can be close to 2.4 billion.

This summary provides the list of those celestial beings revealed by The Urantia Book who are living alongside our humanity upon our planet.
